

PREM KUMAR

Cyber Security Student | Aspiring Cloud Security Engineer

Sivaganga, Tamil Nadu – 630552 | prem.cybersecurity@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Integrated B.Tech–M.Tech CSE (Cyber Security) student at National Forensic Sciences University (NFSU), with a foundation in Linux, computer networking, Python, Bash scripting, cloud infrastructure, and security engineering. Building practical experience in authentication, cryptography, secure data storage, web security, AWS, and security-focused application development, with a career goal of becoming a Cloud Security Engineer.

EDUCATION

National Forensic Sciences University (NFSU), Guwahati Campus | Integrated B.Tech–M.Tech CSE (Cyber Security) | 2024–2029

Relevant Areas: Cyber Security, Computer Networks, Cryptography, Operating Systems, Web Application Development, Cloud Security

Sivaganga District Government Model School | Class XII | 81.67%

TECHNICAL SKILLS

- **Cyber Security:** Network Security, Web Application Security, Cryptography, Authentication & Authorization, Secure Data Storage, Security Fundamentals
- **Systems & Networking:** Linux, Computer Networking, Network Troubleshooting, SSH, Process & Service Management, Linux Permissions
- **Programming & Scripting:** Python, Bash Scripting
- **Cloud & Infrastructure:** AWS, Docker, Terraform, Kubernetes, Cloud Security, DevSecOps
- **Security Tools:** Nmap, Wireshark, Burp Suite, Metasploit
- **Development & Databases:** Git, GitHub, SQLite, HTML, CSS, JavaScript

PROJECTS

Password Security Lab

Python • Flask • JavaScript • Cryptography • Cybersecurity | [GitHub](#)

- Developed an interactive password security laboratory for analyzing, generating, testing, and understanding password security through practical security experiments.
- Built password analysis and secure generation features covering strength, entropy, character composition, patterns, common-password risks, and cryptographically secure randomness.
- Implemented educational labs covering password hashing, salting, bcrypt, Argon2id, dictionary attacks, brute-force search-space analysis, credential reuse, password policies, and privacy-preserving breach checks.

Habitly — Habit Management Web Application

Web Development • Git • GitHub • Netlify | [Live Demo](#) • [GitHub](#)

- Developed a responsive habit-management web application with a clean interface designed for desktop and mobile use.
- Implemented frontend interactions, maintained the project with Git/GitHub version control, and deployed the application on Netlify.

Cyber Security Portfolio

HTML • CSS • JavaScript • GitHub • Vercel | [Live Portfolio](#) • [GitHub](#)

- Designed and developed a responsive cybersecurity portfolio showcasing projects, technical skills, certificates, achievements, and professional profile.
- Implemented responsive navigation and project presentation for desktop, tablet, and mobile devices, and deployed the portfolio using GitHub and Vercel.

ADDITIONAL INFORMATION

Career Focus: Cloud Security Engineering | **Core Interests:** Linux, Networking, AWS, Cloud Security, DevSecOps, Cybersecurity
